

BRANDED FLOORMATS

Preparing Non-Slip Traction Strips:

On the back, you'll find non-slip traction strips pre-installed.

Lift a corner. Using a knife, carefully pick apart the liner from the non-slip strip.

Once it's started. Peel the liner with one hand while keeping the strip in place with the other.

Continue this process, removing the liner entirely.

Scan this code with your phone:

Repeat the process for the other strip.

Turn the mat over and place it where you need it.

The non-slip traction strips will help keep the mat in place during use.
